

PRODUCT DATA SHEET

STONE TYPE WELSH BLUE PENNANT SANDSTONE

PRODUCT NATURAL RANDOM WALLING

DESCRIPTION

Appearance: Fine grained pennant sandstone
Predominantly brown/okra stone with minimal blue colour

Finish: Natural -

Geological Type: From the Rhondda Beds of the Pennant series of Carboniferous Sandstones

Quarry of Origin: Gwrhyd Quarry

APPLICATION

Heritage projects both commercial and domestic. Garden walls, retaining walls, self-build projects etc. The Natural random walling is hand-picked to ensure that each piece has a natural oxidised face of browns and okra's. This is basically a larger random product for areas where these colours are more prevalent (West Wales) or the customer prefers this colour pallet

SUPPLY

Pack Weight	Approximately 900 Kgs.
Packaging	Double bagged - Jumbo bags

PHYSICAL PROPERTIES

Work Dimensions	Random lengths and random heights, random shapes. Some stones may need dressing.
Bed width	Larger range of sizes than our cropped block stone. Bed sizes vary, ranging from approx. 100mm < 200mm as a mixture of sizes
Coverage	1 bag will build approximately 2 – 3 m ²
Compressive strength	122 MPa min
Water Absorption	0.74%

FUTHER INFORMATION

WEATHERING

It should be appreciated that with all products weathering and site conditions can cause shade variation to appear on individual units. This does not in any way affect the performance of the units and any such variation will diminish over a period of time as the product matures.

NOTE: As with all natural stone products the product is subject to colour variation.

GENERAL

Natural walling is supplied in random lengths, heights and shapes. This product needs to be laid by an experienced craftsman.
